Our Aim is to help clients win with Electrical Valve Automation, the power to control the flow at your fingertips. We are transforming the way of industrial solutions with fresh perspectives. Explore more on how we elevate the Industry.

Cair is an India based ISO certified (9001:2015) Electrical Actuation Specialist & Industrial valves firm. Designing, Manufacturing and supplying a wide range of manual and electrical actuated valves to almost all industries and applications since 2002. Cair is one of the prominent market player in the valves, electrical actuators and Electrical actuated valves.

With the State-of-the-art in-house designing, manufacturing and testing facilities, Cair is able to provide the industries with high quality valve and actuation solutions with competitive price and quick delivery across the globe!

Our Actuation test lab ensures the quality of products before the delivery with true bench testing and stress tests, simulating the work conditions. Our R&D primarily focuses on Electrical actuated valves and we are renowned in the market for our innovative solutions and global clients.

Centelon IT Solutions LLP

Chem Process Systems Pvt. Ltd.

Chem Process Systems is a premier engineering firm renowned for its innovative approach in the design, engineering, manufacturing, and commissioning of equipment and comprehensive turnkey plants. Specializing in advanced technologies such as vacuum systems, evaporation, crystallization, drying, heat and mass transfer, pollution control, and biological treatment processes, the company excels at transforming complex challenges into value-added solutions.

With a distinguished track record, Chem Process Systems has earned a reputation as one of India's most trusted and efficient engineering solution providers. Recognized as one of the fastest-growing engineering companies in the industry, it plays a vital role in delivering significant benefits to the country, community, and culture.

As the landscape of technology evolves across various industrial sectors, Chem Process Systems remains steadfast in its commitment to its core ethos: practicing superior engineering for a brighter, more sustainable future.

Chemey Mechatronics LLP

Chemey specializes in designing, manufacturing, and selling modular aluminum handrails under the EnduRail brand. Over the past 10 years, it has installed 100,000+ meters of EnduRail across 12 countries in industries like STP, DeSal, ETP, cement, power, jetty, and warehousing.

Key Features of EnduRail:

- Complies with OSHA, EN, ASTM, BIS, NBC-2016 of India standards
- Made of high-tensile aluminum pipes and structural fittings
- Corrosion-resistant in STP/WTP environments (pH 4-10)
- 100% modular no welding required for installation or maintenance
- Pre-anodized/powder-coated no painting needed
- Lowest life cycle cost compared to most metals

Beyond EnduRail, Chemey offers work-at-height access systems, barricades, and loading platforms, ensuring safety compliance in O & M of heavy engineering equipment, bulk processing & handling, manufacturing and assembly etc.. All products are designed to prevent accidents and protect people.

Dishita Automation

We are a Packaging Machinery Manufacturer's & Exporter's & Turkey Solution Provider with more than 15 years of expertise. Our company is to specialize in the design, manufacture and marketing of special purpose machines.

We Are Specialist In:

- Automatic Rinsing, Filling & Sealing Machine For Cups, Jars, (Products: Juice, Jam, Water & Curd)
- Automatic Bottle Rinsing, Filling & Capping Machine For Water, Juice, Jam, Chemicals.
- Automatic 20Lit Jar Rinsing, Filling & Capping Machine
- Automatic 20Lit Jar Internal & External Brushing Machine (20Lt & Soda Glass Bottle)
- Automatic Bopp Labeling Machine For Round & Square Shape.
- Shrink Sleeve Applicator With Shrink Tunnel
- Different Type of Conveyors

As Per Client Requirement.

Our Services:

We also do Maintenance & Services to other machine manufacturers and spare parts.

Supplying assorted high-quality packaging machines such as servo-based machines, pneumatic based machines, mechanical packaging machines and machines for various packaging applications.

Besides supplying typical machinery, we also accept custom orders to meet different requirements. Able to develop high efficiency and capability-enhanced labeling & sieving equipment, we also offer the most well-organized after-sales service.

Dunamis Machines International Pvt Ltd

Machinery manufacturer founded in 1999 which has dedicated itself to manufacture and supply of machineries for the beverage industry.

Product Basket:

- PET Bottle Blow Molding Machines with Accessories
- PET Bottle Rinsing, Filling and Capping Machines

Major Benefits for buying Fully Automatic PET Bottle Blow Moulding Machines from Dunamis Machines

- We have introduced Air Recovery System so the total connecting load for the machine with accessories is only 28 H.P. for giving an output of 2000 BPH
- Book type mould closing technology reduces the blowing cost to only 6 pais

Dunamis Machines focus is on achieving International quality standards, cost effectiveness and adherence to committed delivery schedule in order to achieve total customer satisfaction. The manufacturing facility comprises of Assembly Units, Fabrication Shops and Testing Units. The Assembly shop is equipped with the necessary Machines, Tools & Components, Materials, etc... for efficient production. We devote ourselves to technical research in order to build up a good reputation & brand equity. A Dedicated service team is always ready to attend to the needs of our esteemed customers. Our company ensures global quality and easily serviceability

Jay Engineering (AIRFIN Diffuser)

Ms. JAY ENGINEERING (AIRFIN Diffuser) was founded in the year 1993 and have gained more than three decades of experience in the field of fluid engineering and environmental pollution control. AIRFIN has quickly made a name for themselves by bringing the most well designed and specially formulated membranes that go a step beyond what conventional EPDM and Silicon membranes provide. Our EPNOL membrane offering provides up to 80% more strength and elasticity than conventional EPDM membranes found in majority of the Diffusers.

And with their SILCOX Membranes, we are in a league beyond when it comes to Silicon membranes. Our SILCOX membranes are at 400% Elasticity, and 180% higher in tensile strength. SILCOX has proven to be the strongest silicon based diffuser membrane on a world stage.

Leading manufacturer of aeration system and biological treatment equipment. Reliable, High quality control products with over 30 years of experience. Complete solution for Municipal, industrial and private waste water treatment plants. Design, supply and service of complete aeration systems and products. More than 1,000,000 units and 3000 installations as of 2022 at various sites in India and abroad working satisfactorily. With strong distributor network throughout India and overseas for clients, consultants and OEMs. Suitable for newly developed treatment plants, upgrades of existing facilities or maintenance. Well-equipped in-house testing facilities for our products. Meeting ASCE standards for SOTR, SOTE, DO, air discharge and head loss etc...

KWS Evaporators Pvt. Ltd.

We are glad to introduce us as one of the leading manufacturer of Multiple effect Evaporators in INDIA. Our business is run by team of technocrats who have very good experience in their respective field of operations. We manufacture different type of evaporators such as Falling film, Forced circulation, Natural Circulation and Pan Evaporators, Chiller Crystallizers, Basket Centrifuges and Pusher Centrifuges etc.

We design, fabricate, erect and commission the evaporators as per our client requirements and are highly energy efficient and reliable from the operational point of view. For effluent treatment where ever the zero discharge norms of TNPCB have to be met, the only choice is to go for the multiple effect evaporators followed by Crystallizers. Here the main object to reduce the outflow from the effluent treatment plant and recover water and salt in pure form in order to reuse it in the process. We have manufactured and commissioned more than 100 plants for this application.

Memtrix Technologies LLP

Memtrix Technologies LLP is a renowned manufacturer of Hollow Fiber Membranes specializing in cutting-edge water and waste treatment membranes. With a steadfast commitment to innovation, sustainability, and customer Satisfaction, we have established ourselves as a trusted leader in the industry. Memtrix Technologies provides solutions for wide array of Submerged and Pressurized Hollow fiber membranes for applications in ETP, STP and WTPs.

Backed by a team of experienced engineers and industry professionals, we combine technical expertise with a passion for innovation. Through extensive research and development efforts, we continually push the boundaries of membrane technology to create advanced solutions that meet the evolving demands of the water treatment industry.

Microtek Technologies

Warm Greetings from Microtek Technologies!!!

We take pleasure to inform you that We are Exclusive Distributor for ,Hach Company India, USA(A Div. of DHR Holding India Pvt Ltd.) USA who are Pacesetters in Manufacturing of Analytical and Lab/Online water analysis like:

Full range of wet chemistry analysis:- Benchtop/ Portable pH, DO, ISE, Conductivity Meter, Turbidity Lab BOD, COD Colorimeters, Spectrophotometer etc. Includes online analyzers for the measurement of pH, DO, Conductivity, Turbidity, BOD, COD Analyzer etc.

Titration Systems, Reagents, Standards, Microbiology, Test Kits & Test Strips

TOC Analyzers: for Ultra-Pure Water & Waste Water Applications.

Services for all lab instruments: We, at Microtek Technologies, are very focused on the kind of market segments we target and hence we are growing at a fast pace. This company is owned and run by complete technocrats who have 10 years of experience in this field. We have a wide range of instruments which cater to Research Institutes, Pharmaceuticals, Chemical Industries, Biotechnology, Life Sciences, Universities, Power Plants, Food Industries etc.

While providing the best of equipments to our customers, we cater to service required by our customers in regards to installations, breakdowns if any and hence we have put a Service team in place to cater to these needs.

Address: 22, 2nd St., Aravind Nagar, Madambakkam, Chennai-600 126

Midhu Industries

MIDHU Vertical inline Pump kits are the products from Midhu Industries , Coimbatore , having 100% in house manufacturing facility to produce high quality and reliable stainless steel parts

Have more than 30 years experience in development of fully fabricated stainless steel sheet metal hydraulic parts like impeller and diffuser etc.

Having infrastructure to design and development of Press tools and moulds using modern technologies like CAD CAM and high speed die mould machining.

Our components are made up of high quality stainless steel sheets Which are directly procured from reputed steel plants.

Our Products are widely used in ..

Neeravi Aqua & Fire Solutions

Neeravi Aqua & Fire Solutions is a leader in providing innovative products and technology used in the field of Water Treatment and Waste Water Treatment. Located in Delhi, India, we are the biggest name in the market for offering a vast range of quality products like Coarse Bubble Diffusers, Fine Bubble Diffusers, Tube Settler Media, Bio Pac Media and MBBR Media, Rota-meters - online/panel mounted, Adaptor, Plastic Filter Nozzle and Fire Alarm System. Our team of experts is committed to delivering high-quality products using improved top of the line technology backed with dedicated services. The products are easy to install and tested to keep quality control as required and are known to be cost-effective and durable. Our hard work and competitiveness ensure complete customer satisfaction as a one-stop solution to all water treatments.

Neeravi, Aqua and Fire Solutions, is the brainchild of Mr. R. S. Lodha with the vision to provide comprehensive, reliable and cost-effective solutions, specifically to meet the client's needs. Mr. R. S. Lodha started his career in Kanpur in 1984 as Director of Ujala Auto Electric Pvt. Ltd, an ancillary unit of LML Ltd, manufacturers of Vespa Scooters.

Neeravi Aqua and Fire Solutions was founded by Mr. Lodha in 2014 after he left his position as G. M. Commercial at Aventura Components Pvt. Ltd, a leading name in the water treatment industry. Here he was responsible for product and vendor development. He also looked into company finance

Nisko Pinnacle Telematics Pvt Ltd

Pinnacle Telematics provides encompassing Smart Metering Solutions with up-to-the-minute communication technology, IoT terminals, and cloud-based software to our clients across the globe. Since 2010 Pinnacle Telematics has deep-rooted a complete, multi-level R&D system that includes design research, development, testing, technical assistance and after service.

With years' commitment in showcasing and nearby arranged assistance, Pinnacle Telematics gets exceptionally acknowledged across our partners and clients. Pinnacle Telematics are continuously functioning on the edge of innovation to convey best in class metering items to clients. Pinnacle Telematics is the First Indian metering manufacturer, who released 2 vital IoT metering network solutions: NB-IoT, LoRa.

with our different IoT advancements Pinnacle Telematics satisfy numerous client's necessities in different situations like "Estimating Each Drop of Water", None Revenue Water Management, Central & Distributional Heating Measurement, Automatic Calibration of Metering Devices, Fix Network Metering, and Walk/Drive By solutions, which covering private, business, state, agricultural, and industrial utilization.

NX Filtration (Ceramed Engineers Limited)

Optimaheat Technologies

Optimaheat Technologies, Mechanical vapor re-compression is the most effective means available for economizing on energy consumption. The evaporation process is initiated by Electric heater. Vapour generated from boiling effluent is then compressed to suitable pressure and sent to heat exchanger shell side as heating medium. After achieving steady state, no further external steam is required for operating the system. Roots blower are used as MVR depending on capacity of the compressors. Sometimes two stage operation is considered. First stage evaporating majority of effluent where in effluent concentration is such that boiling point elevation is below 3oC and balance evaporation is done in second stage where boiling point elevation could be high as 15oC. This is done to minimizing power consumption for MVR.

OptimaHeat Technologies provides only forced circulation type calendrias for ZLD applications to minimize fouling. Concentrate from the evaporator is sent to electrically heated ATFD

Ozone Engineers Private Limited

Ozone Engineers Private Ltd, founded in 2012, is a leading manufacturer and solution provider of cost-effective and environmentally friendly Ozone Technology. Our products and services are internationally present in many different industries and applications for Water & Air Treatment. We operate in several different markets from the Water / Wastewater industry and industrial Smell Remediation to the Reduction of Foodborne Pathogens and livestock applications like aquaculture and poultry Industry. Ozone Engineers has its presence in Pan-Asian countries, Europe & US.

With years of expertise and a commitment to excellence, Ozone Engineers has earned its reputation as a leading provider of customized ozone solutions. Our seasoned professionals working closely with clients to identify, design, and implement cutting-edge ozone systems for diverse applications.

“At Ozone Engineers, we maintain standards and provide innovative solutions that prioritize sustainability. Transparency in Product Quality and After-Sales Services is key in our operations with trust and accountability.

Ozone Research and Applications (India) Pvt. Ltd.

ORA IPL (Ozone Research & Applications India Pvt. Ltd.) is an ISO 9001:2015 certified company specializing in water and wastewater treatment solutions. We manufacture ozone generators, PSA-based oxygen plants, ORAFILT Variable Voids Media Filters, and Capacitive Deionization Units. Our manufacturing facility, located in Hingna MIDC, Nagpur, India, produces ozone generators ranging from 1 gm/hr to 120 kg/hr. We are a leading supplier in Asia, having delivered over 250 ozone generators globally for various applications such as disinfection, wastewater treatment, and cooling tower water treatment. We have also developed the “CONPOLOX-AOP” technology for removing pollutants from condensate water in industries like sugar mills. Our products have been successfully installed in major companies like UPL Limited, Galaxy Surfactants, Royal Petro Chem Detox, and Coca-Cola.

Rostfrei Steels Pvt. Ltd.

ROSTFREI STEELS PVT. LTD. an ISO 9001:2015 and having FM4020 Approved products with its excellent service, product quality and proven track record, has established itself as the premier OEM manufacturer and turnkey service-provider of LIQUID STORAGE TANKS & SOLID STORAGE SILOS. Our products range from highly customised ZINCALUME, Fusion Bond Epoxy steel Tanks and GLASS-FUSED-TO-STEEL Tanks and Silos best fit for storage of seeds, grains, pure water, waste-water, oil, chemicals, molasses, Biogas digesters etc. ROSTFREI has executed more than 9000+ installations in approximately 25 countries worldwide.

ROSTFREI has earned a reputation of providing expert multifarious services to our venerated clientele that includes designing, manufacturing, supply, installation, erection and completion of various types of liquid tanks used for numerous types of applications. Rostfrei Steels offers the comprehensive services for tanks & silos in the sector of water infrastructure, solid waste management, agricultural infrastructure. We complement these services with wide ranging assistance in optimization of operation of new or rehabilitated water plants, private and government water schemes. We offer solutions from concept to commissioning and go the extra mile by holding the hand of the customer till Operations & Maintenance of the tanks.

Our Products:

- Liquid Storage Tanks
- Grain Storage Silos
- Material Handling Equipments
- Zincalume Tanks
- Hopper Bottom Silo
- Fittings & Accessories
- Glass Fused Steel Tanks
- Flat Bottom Silo

Scientific Devices (Bombay) Pvt Ltd

Scientific Devices (Bombay) Pvt Ltd – is leading manufacturer of instrumentation products in the field of flow, level, pressure and temperature. Our products are approved by all the leading consultants and OEMs.

Key Strengths

- Customer centric approach
- Team of Well-Trained Engineers
- Prompt & Professional after sales Service
- Robust manufacturing capacity to meet stringent delivery requirements

Our Products

- * Flow Transmitters - Electromagnetic/Vortex/Turbine/Coriolis & Thermal mass & Ultrasonic.
- * Rota meter - Glass tube/Metal Tube/Purge/Acrylic
- * Flow Element - Orifice flange assembly/ Averaging Pitot tube
- * Flow Indicators/Strainers - Full view/ Double window/ Basket/ Y&Tee Type strainers
- * Level Transmitter - Ultrasonic/Hydrostatic/Radar/Magnetoresistive/ Capacitance/DP Type
- * Switch & Indicator - Magnetic/Displacer/Tuning fork/Rotary paddle/Capacitance/Reflex/Tubular/Transparent/Float & Board
- * Pressure & Temperature - Gauges/Transmitters/Switches/RTD/Manometer
- * Flame Arrestor - Inline/ End of line & Breather Valve

SKF Magnetic Mechatronics (S2M)

SKF Magnetic Mechatronics founded in 1976 is the leader in magnetic bearings and high speed electric motors technology. SKF's high-speed electric motors equipped with magnetic bearings are revolutionizing the wastewater industry. These motors, featuring permanent magnet technology, offer exceptional efficiency and reliability. They significantly reduce energy consumption and maintenance cost.

The magnetic bearings eliminate the need for lubrication, resulting in a cleaner, more sustainable solution. Additionally, the integrated monitoring and diagnostic capabilities enhance operational reliability by identifying potential issues before they lead to equipment failure.

In wastewater treatment, these motors are used in aeration blowers, which inject compressed air into aeration tanks to support aerobic bacteria in breaking down organic waste. This process is crucial for effective sewage treatment.

Overall, SKF's innovative motor technology not only improves the efficiency of wastewater treatment plants but also contributes to a lower environmental impact, aligning with global sustainability goals.

Smart Water Solution

India's Fastest Growing Manufacturer of Booster Pumps, RO Adapter & Spun / Housing.

Booster Pumps: We manufacture Booster Pumps, which has noise-free operations without any kind of vibration. Easy to install and highly durable, these are manufactured using precision engineered components. Also, these pumps can sustain constant pressure and can be availed with in-built voltage controller for maximum reliability.

RO Adapter: We are the leading Manufacturers & Supplier of RO Adapter Delivering Complete Satisfaction with 6 Months Replacement Warranty Our RO Adapter presents complete safety device for all other electric parts in water purifier.

Spun / Housing: We manufacture these by utilizing high grade raw material, sourced from the most trusted vendors. These products are highly demanded among the clients due to their effectiveness & promptness. Made of high quality polypropylene filter media, Filter Cartridge is designed cost-efficiently to catch particulate suspended solids in the water sources. It reduces Sand, Slit, Dirt and Rust particles. It can be used as a pre-treatment for residential water treatment systems.

Address: Old no. 36 / New No.75 3rd Cross Street, Scheme Road,

Smart Engineers

Our Major Equipment Lists:

- Multi Disc Screw Press
- Multi Effect Evaporator with ATFD
- Sludge Paddle Dryer
- STP, ETP AND WTP Equipment
- Electrical Crystallizer for Sulphate Salt Recovery
- Clarifiers, HRSCC and Clarifloculators
- DAF System for Oil Removal

Smart Engineers Collaborate with numerous Industries Including:

- Textile Industry
- Leather Industry
- Paper and pulp Industry
- Food and Beverage Industry
- Automotive Industry
- Pharmaceutical Industry
- Sugar Industry

Somaiya Techno Products (Alpha Blowers)

Spectra Plast India Pvt Ltd

Spectra Plast India Pvt. Ltd., is a leading manufacturer and exporter of conveyor beltings, chains and its accessories. With an expertise of 21 years and a network well established across 25 countries around the globe, we serve the conveyor manufacturers, machine builders, Bottling, etc.

Our Range of products includes Modular belt, Slat chains, Wiremesh belts, Conveyor rollers, Wear strips & Guides holding more than 1000+ varieties of products in stock.

We manufacture tailor made engineering plastic components from UHMWPE, Cast nylon, POM (Delrin), PEEK, PTFE, PP

We are Authorized distributors for Rexnord range of conveyor components with more than 750 products readily available at our state of art warehouse.

Spray Engineering Devices Limited

Spray Engineering Devices Limited (SED) having Head Office at Mohali, Punjab and three manufacturing facilities at Baddi (Himachal Pradesh) is pioneer in the field of Evaporation, Heat Exchanger, Condensation and Crystallization. Established in 1992 from a modest start of manufacturing of spray nozzles, SED today has established its existence in more than 40 countries by providing innovative technological solutions for sugar & allied industries. SED has emerged as one of the fastest growing technology driven company, striving to provide world class integrated energy efficient equipment and solutions for entire sugar sector across the globe. SED has revolutionized the water sector by providing most efficient water recovery and recycling solutions through low temperature evaporation technology based on MVR system. This patented technology is operating without use of heat i.e. boiler, steam, cooling water etc. eliminating use of Fossil & Non-Fossil Fuel Boiler, Condenser & Cooling Tower units etc. The technology is highly efficient and eco-friendly for concentration of any type of industrial effluents or domestic wastewater. It recovers upto 99% high quality clean water by concentrating wastewater/effluent and reducing its mass/volume to negligible providing environment friendly solution. This multiple low temperature evaporator is running successfully and performing excellently in more than 50 plants globally from last 3 years on various applications in water sector. The recovered clear water is recycled back to the process and there is no need of pre and post treatment of the water.

BENEFITS OF LOW TEMPERATURE EVAPORATOR:

- Upto 99% clean water recovery and recycling
- Minimal electric power demand
- Wide applicability
- No external heat source requirement
- Lowest foot-print area
- Automated operation
- No heat rejection unit
- High quality product

Address: C - 82, Industrial Area, Phase-VII, Mohali – 160055, Punjab, India.

Synergy Solutions

We (SYNERGY SOLUTIONS) are manufacturers of PP wound filter cartridges of all sizes. We supply cartridges at high precision, standard, and low cost. Please find our product catalogue. We have been in this business since 2018 with an excellent track record of customer satisfaction. Ours is a fast-growing MSME. We like to expand our market globally; so far, we have successfully marketed Chennai and southern region markets in Tamilnadu and are expanding further. We have adopted the latest machinery and equipment technology to enhance our manufacturing process and required production.

Please find the attachments of our quotation. Syflo® is our own brand of PP wound filter cartridges and Melt blown spun filter cartridges

Teknofanghi Water Treatment Asia Pvt Ltd

Teknofanghi Water Treatment Asia Pvt Ltd Pune is a branch of Teknofanghi Group with its Headquarter in Milan, Italy. Teknofanghi was founded in 1987 and it is specialized in the design, manufacture, and supply of equipment for sludge thickening, dewatering & handling and microfiltration solutions for different types of water & wastewater. With over than 35 years of experience, Teknofanghi is a renowned international leading player, with products installed in the 6 continents and more than 100 countries, including India, where it has been for over 20 years across all sectors (from municipal to industrial). Teknofanghi pays constant attention to environmental issues, embracing technological innovation, recycling water and implementing energy-efficient processes. On top of this, Teknofanghi machines are well known for minimal maintenance required, being long-lasting, having a compact design - less footprint requirement, working fully automatic - less manpower requirement and being operator friendly, both as plug & play solutions and equipped with safety protections. Teknofanghi products are: Monobelt® Filter Press, Scrupress® and Teknobag-Draimad® (bag-based system) for sludge dewatering; Scrudrain® (Drum Thickener with Archimedean Screw) for thickening; Teknodisk® and Scrufilter® for microfiltration; Polydilution® (Polyelectrolyte preparation & dosing system) and TeknoMix+® for mixing.

Time Technoplast Limited

Time Technoplast (www.timetechnoplast.com) is a leading technology based innovative polymer product Company. Over the years, Time Technoplast has emerged as a formidable player in the polymer space with a product range that caters diverse segments like Industrial Packaging, Infrastructure, Lifestyle, Composite Cylinders (LPG, CNG and Oxygen) and Auto Components related products. It focuses on replacing metals with polymers in high performance areas using innovation and latest technology. Time Technoplast services wide spectrum of user industry in each of its business verticals reducing sectoral risks and tapping new opportunity for growth. Time Technoplast is an aspiring Indian multinational having presence in India, Thailand, Taiwan, Indonesia, Vietnam, Malaysia, UAE, Bahrain, Saudi Arabia, Egypt and USA. The Company is market leader in 9 out of 11 countries it operates in.

Trumen Technologies Pvt. Ltd.

Trumen is an ISO 9001:2015 certified manufacturer & exporter of level and pressure sensing instruments

Trumen came into existence in 2009 and initially started with manufacturing of Tuning Fork Level Switches for liquid and solid applications. With time, the manufacturing range increased with addition of Capacitance Level Transmitter & Capacitance Level Switches, RF Admittance Level Switches, Rotating Paddle Level Switches, Conductivity Type Level Switches, Vibrating Rod Level Switches, Hydrostatic Level Transmitter, Radar Level Transmitter & Ultrasonic Level Transmitter.

Now Trumen from Indore Madhya Pradesh is Among India's™s Leading Manufacturers, Exporters & Suppliers of Level & Pressure Sensor suitable for wide variety of applications and used in different process industries like Power, Petrochemical, Oil & Gas, Cement, Steel, Food and Beverage, WTP, Pharmaceutical etc.

Our aim of 21st Century is to be in the list of World is largest Manufactures and Exporters of Level Switches, Level Sensors and Level Transmitters from India.

Address: 39, Mangal Nagar, Behind Sai Ram Plaza, Near Rajiv Gandhi Circle,

AB Road Indore, Madhya Pradesh

Unique Dosing Systems Pvt. Ltd.

Unique Dosing Systems Pvt. Ltd. an ISO 9001:2015 / ISO 14001:2015 / ISO 45001:2018 certified company with an eye to further explore and become the market leader in all types of chemical dosing / metering pumps, agitators & Dosing systems. With a young and dynamic team composed of experienced and expert engineers & technicians, our company has made an indelible mark as manufacturer, supplier and service provider of quality pumps & dosing systems in just a short span of time, since its inception in 2004.

We are bound to serve our clients with simply best product range. Easy installation, low maintenance, robust constructions are few of the features that make our range the preferred choice of clients. Owing to high quality and easy availability, our range has found vast application in Water, waste water, chemical, Petrochemicals, cement, Paper, pharmaceutical, sugar, oil & gas and food & beverage industries.

Universal Aqua Care

Vinayaga Water Tech Systems

We, Vinayaga water tech systems have been started April 2016, dealing with supplies of water treatment plant equipment TMs, our Engineers and Technicians well experienced in to the water treatment field, we are undertaking O&M, plant Service

Our Major Products Are:

- Reverse Osmosis
- Iron Remove Filter
- FRP Vessel
- Cartridge Filters (Spun/Wound)
- Cartridge Filter Housing
- Pressure Switches
- Ultra Filtration
- ETP & STP
- Distribution Systems
- UF Membrane
- Solenoid Valves
- Flow Meter
- DM Plant
- Accessories For Water treatment Plants
- Multi-Port Valves (Manual / Auto)
- Chemical Dosing Tank
- Activated Carbon
- Softener Resin
- Softener
- Float Switches
- RO Membrane
- RO/UF Panel
- Pressure Gauges

Wasser Chemicals and Systems Pvt. Ltd.

Wasser Chemicals and Systems Pvt. Ltd. is a fast-growing manufacturer of a wide range of chemicals for water, effluent, and process treatment applications, along with standard package treatment plants. Our company is led by a team of techno-commercial experts with over 50 years of combined experience in industrial water treatment and management.

We are ISO 9001:2008 certified by American Global Standards (US) for manufacturing and supplying water treatment chemicals and laboratory testing of water, effluents, and air quality.

We provide high-quality products, including:

- Water & Wastewater Treatment Chemicals (Boiler, Cooling, RO, Effluent, Sewage)
- Process Chemicals (Paper, Sugar, Textile)
- Polyelectrolytes, Flocculants & Decolourants
- Descaling Agents & Evaporator Antiscalants
- Biocultures (Aerobic & Anaerobic)
- Fuel Additives & Fire Side Chemicals
- Water Testing Kits & Laboratory Services
- Automation & Dosing Systems
- Operation & Maintenance Services (RO/STP/ETP)

Water 2 People Teknologies

Water Pro Systems Pvt Ltd

Water Pro Systems is a leading components supplier in wide range of Water Treatment, Water Handling & Wastewater Components. Known for its comprehensive industry knowledge and innovative approach, We are closely with OEM's & System integrators. We Provide business innovation in the area of Water Management.

We are the exclusive Authorized Business Associate for :

ALFAA UV System the UV Expert (Global Leaders in providing UV System Solutions.)

- Clean Water Vessels
- Global Water Solutions – USA
- Danfoss Pressure Switches
- Rain Water Harvesting
- C.R.I Pumps/Adelino
- SS Tanks - TAURUS
- UPVC Multi Cartridge Filter (TAURUS)
- HPN Tanks/One Stop Plus GWS USA
- INITIATIVE – MPV'S
- Azud Filter (Spain)
- And Complete RO Components
- Pressure Gauge, Flow meter

Yukon Industries

Yukon Industries is a leading manufacturer of industrial non-metallic valves and automation products, committed to delivering high-quality, durable, and cost-effective solutions. Specializing in UPVC and other thermoplastic valves, we cater to industries such as water treatment, chemical processing, and industrial automation.

Our products are engineered to provide superior corrosion resistance, reliability, and longevity, ensuring efficient fluid control in demanding environments. By leveraging advanced manufacturing processes and stringent quality control, we ensure that every valve meets international standards.

At Yukon Industries, we prioritize innovation and customer satisfaction. Our team continuously works to develop and refine our product offerings, making industrial flow control more efficient and accessible. With a focus on affordability and performance, we aim to support businesses with sustainable, long-lasting solutions. Partner with Yukon Industries for high-quality non-metallic valve solutions designed to meet the evolving needs of modern industries.
